SE “Ukrspirt”

LEADING ALCOHOL MANUFACTURER IN UKRAINE

ABOUT US

SE “UKRSPIRT”

SE “Ukrspirt” is the largest manufacturer of alcohol and alcohol-containing products in Ukraine.

TOTAL PRODUCTION CAPACITY

Total production capacity exceeds 30 million decalitres per year. 41 Ukrainian factories secure the safe operation of the Enterprise.

THE TASTE

It is known that the taste of ethanol and liquor produced on its basis depends on water. Therefore, plants are located next to artesian springs with soft, delicious, living water.

OUR PRIDE

Our team of professionals is our pride. More than 5,000 of the best alcohol industry specialists work in SE “Ukrspirt”

PRODUCT QUALITY

Product quality is our major priority. We have implemented the certified quality, safety, and environmental control management system: ISO 9001, ISO 14001, ISO 22000, Hazard Analysis and Critical Control Points.

PRODUCTION CAPACITY

Our production capacity provides full Ukrainian market supply. Today, we are heading for an increase in the share of exports. «Ukrspirt» products are in demand in Central Asia, Turkmenistan, Georgia, Azerbaijan, Turkey, Austria, Poland, Vietnam, Hungary, Slovakia and other regions.

CLIENTS

We offer our clients an individual approach and transparent, favourable cooperation conditions.

PARTNERSHIP

Progressive attitude, ambition, and honesty are what we appreciate the most in partnership.

SUPPLIER'S

We expect the best supplier's proposals.

PROGRESS

We are continually developing new offers and improving the existing product lines. The production of bioethanol and alternative motor fuel component (AMFC) is one of the most promising trends today.

PRODUCTS AND SERVICES

RECTIFIED ETHANOL

Alcohol “Pshenychna sliozha” (Wheat Tear) is the quality standard. It meets and exceeds the requirements of the international standards. It is a perfect basis for the best liquors: the noble spirit reveals the elite alcohol subtlest flavour.

Alcohol “Lux” (Luxe) is the perfect basis for elite and premium spirits. It gives the opportunity to discover the drink bouquet, playing its unique part. Alcohol is in line with international requirements. It is produced from selected grains.

INDUSTRIAL ALCOHOL

Industrial alcohol is widely demanded in the chemical industry. It is used in a broad range of production fields: from the domestic purposes to the aircraft modelling.

Technical alcohol is a raw material for the production of bioethanol and bioethanol-based components (AMFC), organic chemicals.

Alcohol is produced from natural ingredients and meets the highest quality criteria.

BIOETHANOL

Bioethanol is used for the production of biofuels and its additives. The main advantage of organic fuel is that its base is renewable. Bioethanol is produced from plant sugar- and starch-containing raw materials.

Alcohol “Vyshchoi ochystky” (The Highest Purification) is produced from the highest quality natural ingredients. It is indispensable in the food industry, pharmaceuticals, perfumes, cosmetics, and other areas.

Alcohol “Ekstra” (Extra) – for the classic spirit line. Grain alcohol with excellent organoleptic characteristics. When tasted, it leaves a pleasant, sweet finish. The aroma is almost imperceptible.

PRODUCTS AND SERVICES

THE HEAD FRACTION OF ETHYL ALCOHOL

Raw ethyl alcohol is a high-quality raw material and the basis of rectified ethyl alcohol as well as other products.

It is mainly used in the production of bioethanol and bioethanol-based components (AMFC).

RAW ETHYL ALCOHOL

Raw ethyl alcohol is a high-quality raw material and the basis of rectified ethyl alcohol as well as other products.

It is mainly used in the production of bioethanol and bioethanol-based components (AMFC).

FUSEL OIL

Fusel oil is a valuable ingredient in a variety of industries. It is frequently used as a solvent in the production of paints and varnishes, industrial alcohol, bioethanol and the alternative motor fuel component (AMFC).

CARBON DIOXIDE

Carbon dioxide occurs during the alcohol production. This gas is used in many areas: the food industry (for saturated wines and carbonated beverages), agriculture, and during welding.

SERVICES
